CHARLOTTE'S GREATEST ASSET

The climate of Charlotte is outstanding, and can be classed as our leading asset. The United States Weather Bureau has been making records of Charlotte climate for the past 44 years and the fact is developed that the people of this city live the year round in a temperature which averages 60.2 degrees. The mean maximum temperature is 69.5 degrees and the mean minimum temperature is 50.9 degrees. The vicinity is favored in wind and rain, in shine and shadow. Agricultural activities may be pursued practically without interruption throughout the year.

Distinctive Printing

YOUR customers, present and prospective, get many other pieces of printing besides yours that compete for their attention and their dollar. Therefore, if you are to win out in this competition, your printing must be distinctive—it must have both character and individuality. It need not be garish or bizarre, but it ought to be distinctive rather than ordinary. The right kind of printing is just as important to you as is the personal appearance of your representatives who come in direct contact with customers.
